

ASAP FASTENING SYSTEMS, INC
Supplies for Industry & Construction

“NOW OFFERING A FULL LINE OF THREADED INSERTS AND TOOLING”

CAL Series
 Large Flange Knurled Body
 Thin Wall Series

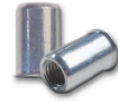

CAK Series
 Small Flange Knurled Body
 Thin Wall Series

CAH Series
 Half Hex Body Large Flange
 Thin Wall Series

CAO Series
 Small Flange, Smooth Body,
 Thin Wall Series. Low profile

CFW Series
 Cadmium Free Knurled Body
 360° Swaging Series

CFT Series
 Cadmium Free Small Flange
 360° Swaging Series

CA Series
 Heavy Duty Rivet Nut Flat
 Head Series, Large Flange,
 Smooth Shank

CPN Series/ CPB Series
 Straight Shank Slotted Body
 Series or Pre-bulbed Slotted
 Body Series

“INTRODUCING THE NEXT GENERATION OF FASTENING TECHNOLOGY!”

RIV-FLOAT®

The internally floating threads on **RIV-FLOAT®** allow for component attachments in off center applications and can accommodate for tolerance stack up in the manufacturing process. The floating nut (.020" radial float) aligns to drive the angle of the screw and thus eliminates cross threading and spin out.

RIV-FLOAT® was designed for post installation in applications where cage nuts, clinch nuts, floating nut plates or weld nuts are typically used.

- .020" radial float
- Large (RFL) and Small (RFK) Flange series available
- Mechanically Locked version available
- Installed with MS 50 Hydro-Pneumatic tool with RIV-FLOAT® nose piece
- Zinc Electroplated to 8µm with trivalent chromate - 120/24
